What do I need to do after TM has successfully upgraded my speed / package?</b></p>	<ul style="list-style-type: none"> <li>▪ Step 1: You are required to turn off your wireless router for 10 minutes to allow new configuration to take place before you can enjoy your new speed.</li> <li>▪ Step 2: Once done, you can start testing your unifi speed at this link <a href="http://speedtest.tm.com.my/">http://speedtest.tm.com.my/</a>.</li> <li>▪ Step 3: Click the 'GO' button on the front page and wait for the test to complete.</li> </ul>

- Step 4: The test will show the result of your current upload and download speeds.

**IMPORTANT NOTES:**

- Before you perform the speed test, please stop any ongoing downloading activities and shut down any programs that may be utilising your connection i.e. P2P, streaming, etc.
- Speed test can be done over wireless, however, for accurate results, it is recommended that the test to be done over wired connection by using LAN cable provided during your unifi home installation. To learn more, head over to our website <https://unifi.com.my/better-unifi-experience/index.html>

- Simply plug the LAN cable from your computer to your wireless router LAN port LAN1 to LAN3 (any of them).

**41 Why couldn't I enjoy the speed as advertised?**

- unifi Home is a wired broadband service. Wireless connectivity is a complimentary feature offered to our customer via the wireless router and it is subject to interference and obstructions factor. Check out our website <https://unifi.com.my/better-unifi-experience/index.html> to learn more.
- Internet access speed may be affected due to several factors such as:
  - Locations of websites; where users may experience lower speed from international websites;
  - Capacity of visited web server, where some web servers cannot cope with huge traffic demand from users OR do not have enough capacity OR where download speed is restricted to ensure fair level of service;
  - Network congestion as a result of network maintenance or outages
  - Running multiple applications simultaneously like user other applications such as Peer-to-Peer e.g.: Bittorent
  - Multiple users sharing the unifi Home bandwidth at customer's premise at the same time.

**42 What can I do to improve the speed via wireless connectivity?**

- We recommend customers to practice these tips in order to improve the speed via wireless connectivity:
  - HEAT – Place your wireless router away from areas with high temperature as heat will affect the router performance and browsing experience.
    - Wireless router should be placed in an open area to allow heat ventilation.
    - Place the broadband equipment next to each other instead of stacking it up to reduce the risk of overheating.
  - DISTANCE – Wireless router has distance limitations when it comes to signal range. As distance increases, the signal becomes weaker.
    - Consider placing your Wireless router in an area where you would frequently do your browsing activities
  - OBSTRUCTION – WiFi signal efficiency will decrease when it passes through physical obstruction e.g.: thick walls, metals and solid objects.
    - Consider placing your Wireless router in an open area to maximise signal reception

		<ul style="list-style-type: none"> <li>b. Avoid placing your router in a closed cabinet, secluded room or under the stairs.</li> </ul> <p>(d) ELECTROMAGNETIC INTERFERENCE – Signal waves generated by home appliances such as microwave ovens, refrigerators, baby monitors can interfere with your WiFi connectivity.</p> <ul style="list-style-type: none"> <li>a. Place your Wireless router away from the home appliances</li> <li>b. Avoid sharing the power socket that is connected with the home appliances.</li> </ul> <p>(e) WIFI SECURITY PASSWORD – A user may hack into your WiFi security password to get free internet access. The more users connected to your Internet, the more bandwidth will be consumed; thus affecting your browsing experience.</p> <ul style="list-style-type: none"> <li>a. Consider setting a unique and strong WiFi security password.</li> <li>b. Consider changing your WiFi security password from regular basis to improve your network security</li> </ul> <ul style="list-style-type: none"> <li>▪ Alternatively, customers can visit this <a href="#">link</a> for further information on tips to enhance your wireless connectivity speed.</li> </ul>
