MOBILE APP (ANDROID & IOS) GUIDE FOR OPTICAL NETWORK ROUTER
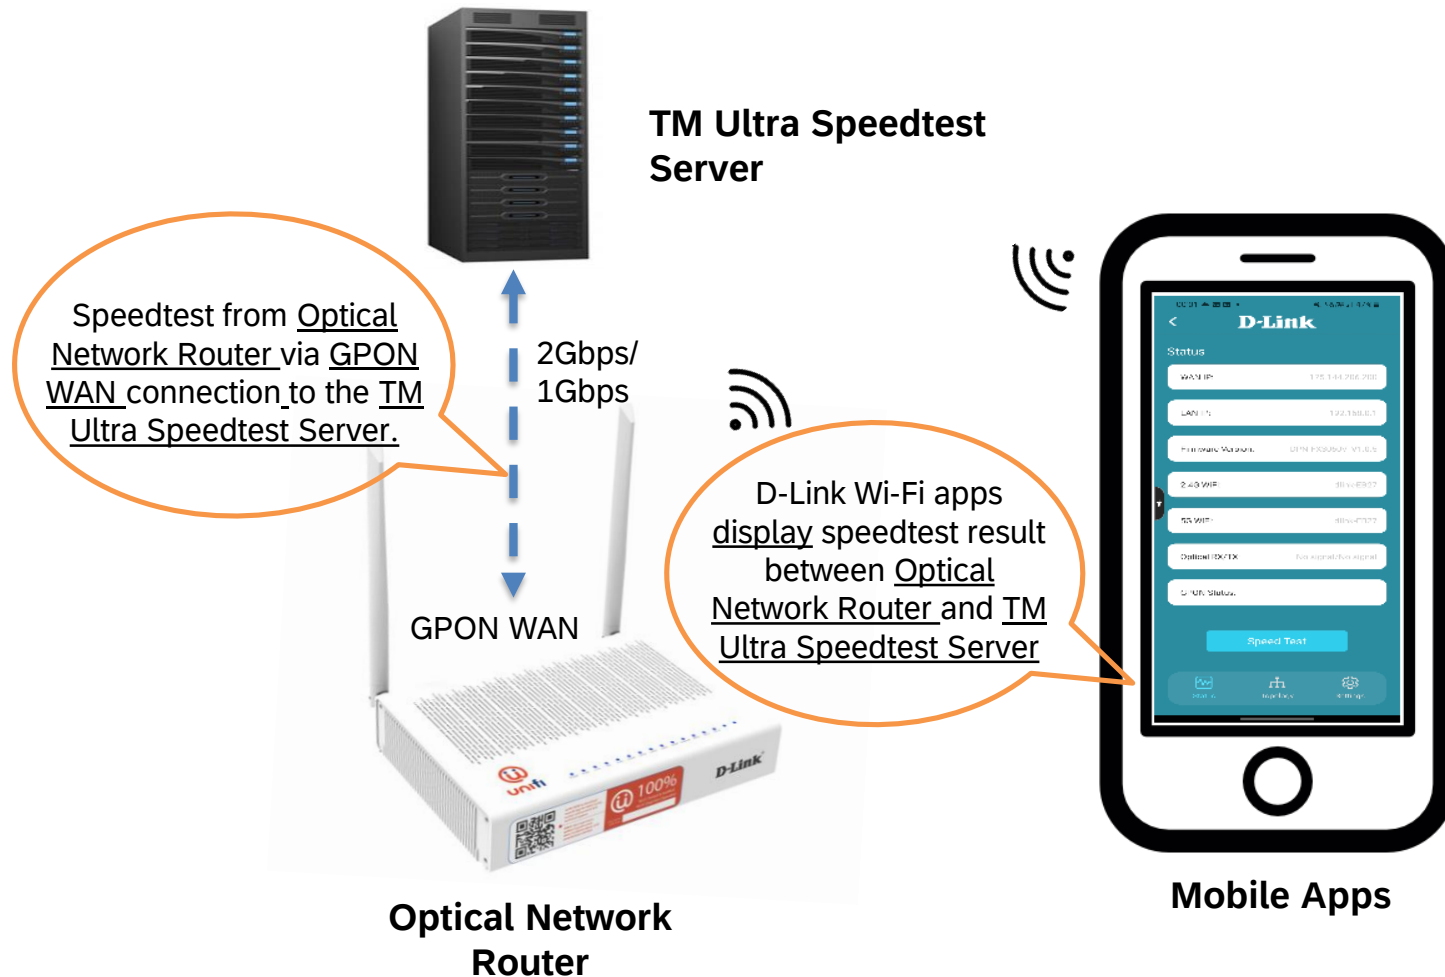

D-LINK DPN-FX3060V

❖ Mobile App Speedtest

Mobile Apps Speed Test

TM Ultra Speedtest Server

Speedtest from Optical Network Router via GPON WAN connection to the TM Ultra Speedtest Server.

2Gbps/ 1Gbps

GPON WAN

D-Link Wi-Fi apps display speedtest result between Optical Network Router and TM Ultra Speedtest Server

Optical Network Router

Mobile Apps

✅ **Speedtest** via **D-Link Wi-Fi Air** app able to achieve subscribe speed for both plan as follows:

    1Gbps
        DL: 1Gbps
        UL: 500Mbps
    2Gbps
        DL: 2Gbps
        UL: 1Gbps

✅ **Speedtest from the main unit of Optical Network Router** via 2.5Gbps GPON WAN interface.

⚠️ Speedtest using single device (Laptop, PC and etc.) via LAN port as opposed to **speedtest via apps will not exceeded more than 1Gbps due to limitation of Gigabit Ethernet LAN.**

Mobile Apps Speed Test

STEP 1: On Status page, slide up and tap on Speed Test button located at the bottom on status page.
STEP 2: Choose TM Ultraspeed Server
STEP 3: Tap on Start Speed Test Button
STEP 4: Wait for the speed test result to be displayed.
